

The use of “Alt” and “Title” attribute in images and it’s importance.

#Use of ‘Alt’ attribute:

The **alt** attribute provides alternative information for an image if a user for some reason cannot view it (because of slow connection, an error in the **src** attribute, or if the user uses a screen reader).

```

```

#Importance:

- Image might not load in some cases and user can have an idea about the image beforehand.

#Uses of ‘Title’ attribute:

- The **<title>** tag defines the title of the document. The title must be text-only, and it is shown in the browser's title bar or in the page's tab.

```
<title>Document</title>
```

#Importance:

- Sometimes we need to get exact information about image. Like identification of a person or place content on image.
